Aim

The idea is to illustrate the different HP assessment cases using visual documentation (photographs), for example Threat type = Agricultural/Pastoral. In other words: illustrate EAMENA concepts with iconic photographs.

Detail of the HP entity-relationship diagram with a sample of photographs illustrating different threat cases

The objective is : * to document particular cases with visual documentation having EAMENA and EXIF metadata (Author, Description, . . . , EAMENA UUID, etc.). * complete the interactive ERD by linking the UUID concept image to the RM. * extend the finalization of reference data documentation.

Contribute

Append your photographs in the Google Drive folder `photos/` and add their metadata in the table `list` (UUID keys in grey are optional)
